

2013 YEAR IN REVIEW

We understand and take care of Veterans better than anyone else. We recognize our patients have been through a lot, and through their experiences we have learned a lot. We're always adapting and expanding our treatments and working in innovative ways to better care for America's heroes.

OSSEOINTEGRATION RESEARCH
FULLY FUNDED FOR CLINICAL TRIALS

FIRST SURGERY ANTICIPATED
2014

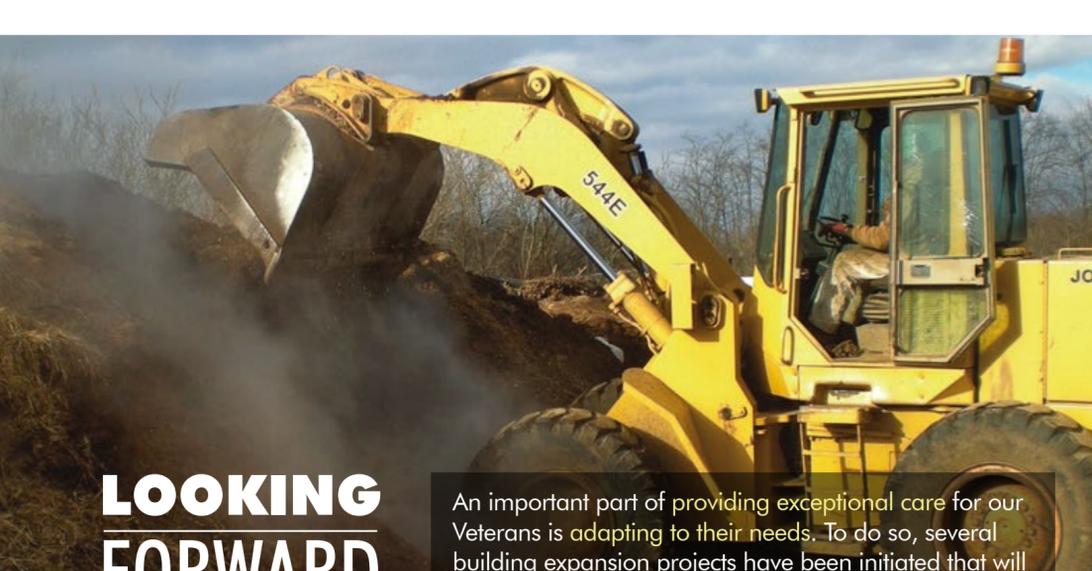

Osseointegration is the process of attaching prosthetics directly to the bone, greatly improving the quality of life for eligible Veteran amputees.

Recent amputee Bryant Jacobs takes a walk after surgery. Bryant may be a candidate for an osseointegrated prosthetic limb in the near future.

LOOKING FORWARD

An important part of providing exceptional care for our Veterans is adapting to their needs. To do so, several building expansion projects have been initiated that will help us provide advanced services and support.
